Indonesian catalysis conference in 2026 (IndoCat 2026) is the 1st annual meeting organized by Masyarakat Katalis Indonesia – Indonesian Catalyst Society (MKICS). The meeting will facilitate the dissemination of the most recent developments on catalysis research not only in Indonesia but also in the neighboring countries. The event will also accommodate the exchange of ideas and networking between academia & industry. IndoCat 2026 will be held in English and will cover numerous aspects in catalysis involving:

- Heterogeneous (solid) catalysis
- Homogeneous (molecular) catalysis
- Bio (enzymatic) - and Organocatalysis
- Photocatalysis, Electrocatalysis, Photoelectrocatalysis
- Chemical Reaction Engineering & Technology (including flow chemistry)
- Catalytic conversion and valorisation of biomass and renewable sources
- Catalysis for natural gases, coals, crude oils, and petrochemicals processing
- Catalysis for organic synthesis in the pharmaceuticals and fine chemicals production
- Catalysis for environmental protection and waste recycling
- Recent development on catalyst characterizations

The selected presentations will be published in:

- Topics in Catalysis
- Bulletin of Chemical Reaction Engineering & Catalysis

The accepted abstracts will also be presented in an e-proceeding issued by IndoCat 2026

July 07th - 08th, 2026
